			Compulsory Module Profiling Phase		
		X	Elective Economics		
			Elective Management		
			Elective Law of Economics		
Specializations			Finance, Accounting, Auditing, Controlling and Taxation (FAACT)		
			Sales Management		
			Entrepreneurship, Innovation and Transformation		
			Environment, Resources and Energy		
		X	Regional, International Development		
			General Management and Economics		
			Data Science and Quantitative Economics		
Learning outcomes The participants learn to understand and apply fundamental theories of international monetary economics. They are expected to remember basic concepts, to explain core theories of international monetary economics and to apply them in form of an analysis of economic shocks and their impact on exchange rates, the money market and output/income.					
Content The course offers an introduction to international monetary economics. Theoretical aspects of international monetary economics are covered, such as international capital flows and exchange rates. In addition, the impact of different exchange rate systems on the effectiveness of monetary and fiscal policy is analysed. Also discussed are international financial crises and the European Monetary System.					
Teaching methods Lecture and Tutorial					
Mode of assessment The module grade results from the written module examination (duration: 60 minutes).					
Requirement for the award of credit points Credit points are awarded after successful completion of the module examination. Participation in the module examination requires that at least two out of three online tests have been successfully completed in advance (at least 60% of the attainable points in each test have been achieved).					
Weight of the mark for the final score (based on a required coursework of 180 ECTS)					
Module coordinator and lecturer(s) Busse or Kruse-Becher with assistants					
Learning material and relevant literature Paul Krugman, Maurice Obstfeld and Marc Melitz: International Economics – Theory and Policy (Pearson Education).
