| <p>Learning outcomes</p> <p>The participants understand the fundamental causes of physical and human capital accumulation and technological progress that determine economic growth paths. They are able to explain drivers and impediments of a “take-off” and cross-country differences in growth paths. Students have theoretical insights into the political economy of growth and empirical insights into varieties of capitalism.</p> |
| <p>Content</p> <p>In this module we study the transition from long-run economic stagnation to long-run sustainable growth that is often called the “take-off”. We move beyond conventional growth theory that explains economic growth with physical and human capital accumulation and technological progress and relate investments in physical capital, human capital and new technology to institutional change, demographic change and industrialization. This will enable students to understand (i) the structural changes that preceded, accompanied, and grew out of the “take-off”, as well as (ii) cross-country differences in the timing of the “take-off”, in growth paths, and, consequently, in income levels.</p> |
| <p>Teaching methods</p> <p>Lecture and Tutorial</p> |
| <p>Mode of assessment</p> <p>The module grade results from the written module examination (duration: 90 minutes).</p> |
| <p>Requirement for the award of credit points</p> <p>Credit points are awarded after successful completion of the module examination.</p> |
| <p>Weight of the mark for the final score (based on a required coursework of 120 ECTS)</p> <p>4,17 %</p> |
| <p>Module coordinator and lecturer(s)</p> <p>Kalkschmied</p> |
| <p>Learning material and relevant literature</p> <p>Will be announced in the lecture.</p> |
