Learning outcomes This seminar will deal with major issues in international trade. By enrolling in this seminar, students can broaden and employ their theoretical and econometric knowledge to this subfield of economics.			
Content			

The seminar deals with different core topics in the area of international trade. It combines theoretical and empirical perspectives. For instance, the seminar deals with firm behavior on global markets, global value chains, trade policy or the nexus between trade and labor markets.

Teaching methods

Seminar (writing of seminar paper, presentations and discussions)

Mode of assessment

The final module examination consists of a written seminar paper. An additional course achievement can be accomplished in the form of an oral presentation of the seminar paper, for which bonus points can be earned. A maximum of 75 points can be earned for the seminar paper and a maximum of 25 bonus points for the presentation. The module score then results from a scale of points ranging from zero to 100 points. The bonus points will also be credited if the module final examination would not have been passed without the bonus points.

Requirement for the award of credit points

Credit points are awarded after successfully passing the module examination (written seminar paper). Participation in the module examination requires that the student has previously presented parts of his/her seminar paper, in which at least 50% of the attainable points have been achieved.

Weight of the mark for the final score (based on a required coursework of 120 ECTS)

Module coordinator and lecturer(s)

Busse/Kruse-Becher

Learning material and relevant literature

Literature will be announced via Moodle and on the website.
