				Sales Management	
				Entrepreneurship, Innovation and Transformation	
				Environment, Resources and Energy	
			X	Regional, International Development	
				General Management and Economics	
				Data Science and Quantitative Economics	
Learning outcomes Seminar participants will broaden and deepen their knowledge of international economics. They will apply fundamental international trade or finance theories in form of case studies. That involves the analysis of current economic challenges in international economics. In addition, participants will apply the bases of scientific work by writing a seminar paper.					
Content Based on either the lecture “Foundations of International Trade” or the lecture “International Finance”, the seminar will cover current topics in international economics, for example, trade protectionism or international financial crises. Participants will write a seminar paper that addresses a specific economic challenge. That includes a theoretical foundation, combined with empirical evidence and economic policy implications.					
Teaching methods Seminar (writing of seminar paper, presentations and discussions)					
Mode of assessment The module examination consists of a written seminar paper and the presentation of the paper (max. 50 points each). The module score is then calculated on a point scale from zero to 100 points. Students can achieve bonus points for active class participation.					
Requirement for the award of credit points Credit points are awarded after successfully passing the module examination (written seminar paper and presentation). Students must achieve at least 50% of the attainable points to obtain credit points for the module.					
Weight of the mark for the final score (based on a required coursework of 180 ECTS)					
Module coordinator and lecturer(s) Busse with assistants					
Learning material and relevant literature Will be announced in the seminar.
